ENTERPRISE PASSWORD MANAGER

Your business runs on passwords. Make sure they never let you down.

1Password gives every person on your team one secure, effortless place to manage their credentials, so you spend less time on IT firefighting and more time on what actually matters.

3x	291	180K+
Faster employee onboarding & offboarding	Hours saved per employee per year	Businesses protected worldwide

WHY IT MATTERS

Reduce Breach Risk

End-to-end encryption and zero-knowledge architecture keep credentials safe.

Lower IT Costs

Cut password reset tickets and reduce helpdesk burden across your clients.

Access Control, Simplified

Set permissions by role, team, or client without complexity.

Always Audit-Ready

Built-in reporting and activity logs keep compliance checks painless.

A Benefit Employees Love

Free family accounts turn a security tool into a genuine employee benefit.

Works Across Every Device

Desktop, mobile, and browser covered on every platform your team uses.

1Password Families, free for every employee

- Up to 5 family members per employee
- Full access on every personal device
- Secure password sharing within the household
- Breach monitoring and real-time alerts
- No additional charge to your business

Up and running in days, not months

01 **Your IT partner sets everything up**
Your MSP handles full deployment, configuration, and integration. You make one call; they handle the rest.

02 **Your team is protected from day one**
Employees just download the app and log in. No IT tickets, no training sessions—just instant protection.

03 **You have full visibility and control**
Every credential is secured and every access event is tracked, giving your IT partner total visibility into your security.

GET PROTECTED TODAY

Ready to stop worrying about passwords?

Your MSP partner can have 1Password running for your entire team in as little as a week. One conversation is all it takes to get started.
